**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 20 and 23, drawn to a method for inducing neutrophil apoptosis.

Group II, claim(s) 6-18, 21-22 and 24-25, drawn to a method for inhibiting release of IL-8.

Group III, claim(s) 19, drawn to a method for increasing bactericidal activity of neutrophils.

The inventions listed as Groups I, II and III do not related to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: a method for inducing neutrophil apoptosis comprising agonizing the G2A receptor is not novel (see US Patent No. 6,214,562 to Weng et al. col 7 lines 25-40)

Therefore, a holding of lack of unity amongst the inventions of Groups I, II and III is proper.
